DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1- are rejected under 35 U.S.C. 103(a) as being unpatentable over Yeager et al. (US 5,969,613).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Yeager et al. (US 5,969,613).

Regarding claim 1, Yeager et al. disclose an electronic article surveillance (EAS) assembly (10) comprising a housing (11) containing an EAS marker (37), the housing defining a viewability channel (50, 51) extending between opposed first and second exterior surfaces (figure 1) of the housing, the EAS marker being disposed aside the viewability channel (figure 1, col. 5, lines 9-16, 45-52 and col. 6, lines 3-11).

Regarding claim 2, Yeager et al. disclose the housing defines a first opening extending through said first exterior surface, a second opening extending through the second exterior surface, said housing defining a passage communicating with the first and second openings, the viewability channel being constituted by said first opening, the passage and said second opening (figure 1).

Regarding claim 3, Yeager et al. disclose the housing defines interior structure at least in part bounding the passage and extending contiguously from said first exterior surface (figure 1).

Regarding claim 4, Yeager et al. disclose the housing interior structure is recessed relative to said second exterior surface (figure 1).

Allowable Subject Matter

5. Claims 9-16 are allowed.
6. Claims 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ryan, Jr. (US 6,137,713) and Holmgren (US 5,144,820).
